Championship

Greenwich Coding Challenge 2020

Viet Nam Supply Chain Challenge -
The Fresh Connection

Anthony Le

Analyst Architect(RnD Engineer) @NAB Architecture lab
Hanoi Capital Region

Summary

A very self-motivated and dedicated person finding a new way to make other industries in the world better by using Technology

Experience

NAB

Research And Development Engineer

September 2022 - Present (6 months)

Melbourne, Victoria, Australia

NAB (National Australia Bank) was ranked 21st-largest bank in the world measured by market capitalisation and 52nd-largest bank in the world as measured by total assets

Responsibilities:

Focus on research new patterns & develop re-useable high-performace and large - scale Distributed

Systems at NAB Architecture lab to serve and reduce development time of software engineers by

build and package things to lib(present and future needed) so they only consider about develop new

feature, don't need to building what actually developed at NAB

Impact:

Develop and maintain libraries cover a range of topics about: data consistency (read-only, read- write

cache, transactional outbox, transaction log trailing), Even

MoMo (M_Service)

Software Engineer

2021 - 2022 (1 year)

Ho Chi Minh City, Vietnam

Momo is the first and largest fintech in Vietnam with more than 35M users(1/3 Vietnam population)

Responsibilities:

Working as swe at transactions history team, cover multi-millions transactions per days

Impact:

Colab with senior engineer and other team to design and implement new transactions history("lịch sử giao dịch")feature to increasing data consistency between 2 services (from 87% to 98%)

Zalo

Software Engineer

2021 - 2021 (less than a year)

Ho Chi Minh City, Vietnam

Zalo is the first and largest social network in Vietnam which more than 80M users, all Vietnamese people in Vietnam and worldwide using it to keep their connections

Responsibilities:

Working at Zalo Official Account team(like Facebook Fanpage), maintained and developed new features for ZOA

Impact:

We developed a service that can deliver messages to millions user by some conditions such as location, their favorites,.... using kafka, java 8

wisdom robotics

Research Assistant

2019 - 2021 (2 years)

Wisdom robotics is a lab focused on AI and robotics

Responsibilities:

Develop robot and implement ML/DL model using arduino, raspberry pi, kinect, jetson nano, jetson tx2

Develop PoC for research model of professor, PhD and PhD student

Research about ML algorithms, Computer Vision

Impact:

PoCs are demo at top tier conferences(ECCV, ICML)

Support 3 teams gain 1 second prize and 2 third prize at VietNam National Science and Technology Contest

Education

University of Greenwich

Bachelor of Science - BS, Computer Software Engineering · (2017 - 2022)
